

JANSEVA-X

Your Government Application Assistant

From citizen intent to completed government application.

Intent-first. Consent-based. Officer-controlled.

The citizen should not have to learn the system before using it.

Deadlines, repeated fields, document hunting, queues, and unclear status turn a simple need into a difficult journey.

Tell JANSEVA-X what you need.

Move from portal-centric government services to intent-centric citizen journeys.

A consent-based intelligence layer guides the citizen while preserving lifecycle controls and officer ownership.

A complete Trade Licence journey - from voice intent to completion.

Live prototype flow. The citizen controls consent and the final submit-or-draft choice.

A guided journey that stays citizen-controlled.

- Consent-based preparation
- Application-aware assistance
- Document-aware guidance
- Explicit submit or draft decision

Verification is transparent, deterministic, and clearly marked as a prototype.

All identity integrations are synthetic / deterministic prototype components.

No real Aadhaar, PAN, UIDAI, biometric, e-KYC, or fingerprint provider is used.

AI assists the officer. The officer owns the final decision.

Approve

- > Generated document
- > Mock e-sign
- > Completed

Request Correction

- > Correction state
- > Citizen sees next step

Reject

- > Rejected state
- > Citizen sees result

A separated, governed application architecture.

JANSEVA AI
Smart Fill/Attach
Mock verification
Fingerprint session
Async worker
Generated documents
Mock e-sign

JWT | Active account | Role authorization
Ownership | Validation | Idempotency
Protected documents | Safe errors

A reusable layer for clearer, more guided service journeys.

For citizens

- Less portal hunting
- Less repetitive entry
- Guided preparation
- Simpler verification
- Clearer status

For government workflows

- Structured review
- Advisory AI
- Controlled lifecycle
- Reusable architecture

FUTURE / PRODUCTION ROADMAP: extend this reusable application-intelligence layer to more services with approved providers and managed infrastructure.

Government services should understand citizens.

JANSEVA-X turns citizen intent into a guided application journey.

Tell JANSEVA-X what you need. We will help you get it done.
